# ABSTRACT

---

AITAX #AITA is a decentralized multi-utility cryptocurrency based on the BEP-20 protocol of Binance Smart Chain (BSC) Aitax Foundation aims to change the world for the better by combining Web3, NFT, Metaverse, GameFi and other Blockchain Specifications. Aita is an BEP-20 Token that can be used for it with low gas fees with all the operations needed for the Aitax Ecosystem. To develop a complete sustainable and decentralized NFT, Metaverse, GameFi infrastructure by incorporating modern technology such as VR, AI, and Web3 into our Aitax Chain and Aitax Ecosystem.

# Introduction

---

AITA blockchain is a cutting-edge decentralized platform that combines the power of artificial intelligence and blockchain technology to revolutionize the gaming, education, and candidate assessment industries. With a focus on providing immersive and personalized experiences, the AITA blockchain is designed to enhance the way people interact with technology and create new opportunities for growth and development.

The gaming component of the AITA blockchain utilizes AI algorithms to create highly personalized and engaging experiences for players. Whether you're a casual or competitive gamer, the AITA blockchain offers a wide range of games that are tailored to your interests and skill level.

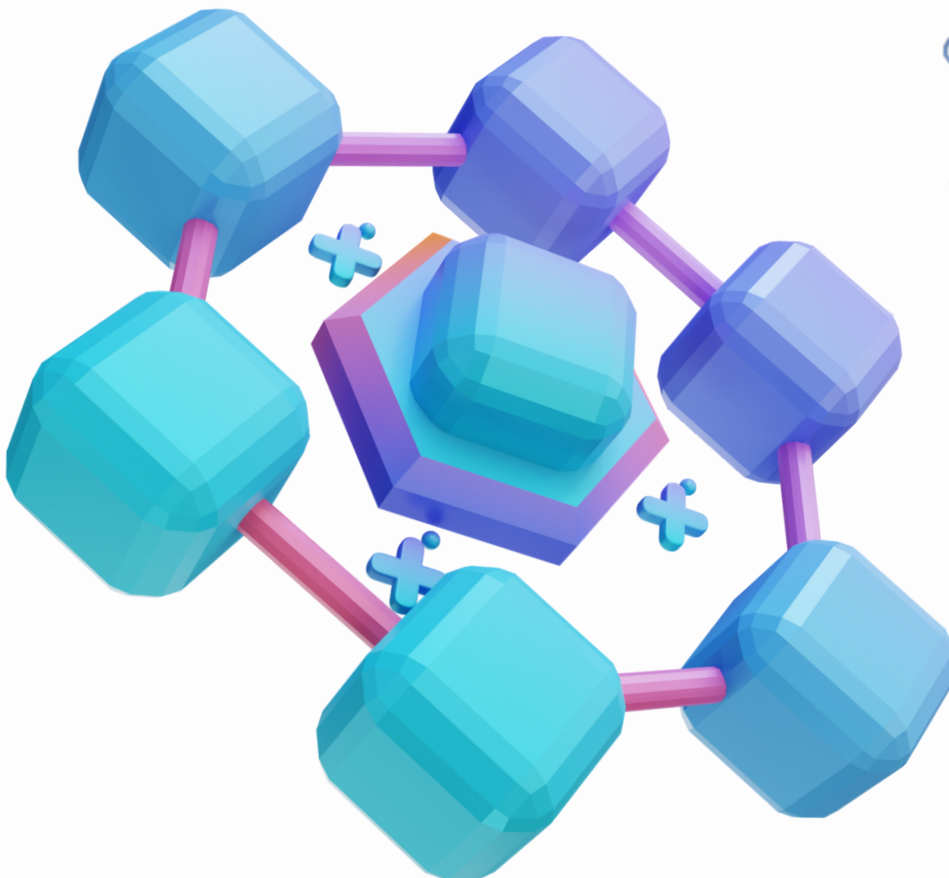

In the education sector, the AITA blockchain leverages AI-powered learning algorithms to provide a personalized learning experience for students. With real-time feedback and dynamic content, the AITA blockchain helps students to better understand and retain new information, leading to improved academic performance.

Finally, the candidate assessment component of the AITA blockchain uses AI to streamline the hiring process and provide employers with an accurate and objective evaluation of job candidates. With its ability to analyze vast amounts of data and provide real-time feedback, the AITA blockchain provides a powerful tool for businesses looking to make informed hiring decisions.

By providing a secure and transparent platform for AI gaming, education, and candidate assessment, the AITA blockchain is poised to become a leading player in the digital age and help individuals and organizations reach their full potential.

# About Blockchain

The AITA blockchain is a decentralized, secure and transparent platform that enables the creation and exchange of digital assets. It is designed to provide a foundation for a new digital economy where individuals and organizations can transact, store and manage their digital assets in a trust less and efficient manner. One of the key features of the AITA blockchain is its consensus algorithm, which ensures that all transactions are validated and added to the blockchain in a secure and tamper-proof manner. This eliminates the need for intermediaries such as banks or other centralized entities, allowing users to have full control over their digital assets.

# THE AITA #AITA TOKEN

AITA Finance #AITA Token is BEP-20 token which is developed on BNB blockchain. Aitax Token has been created to solve a problems but that problem is more social than financial and that is the problem of cooperating with each other. Aitax aims to change the world for the better by combining Web3, NFT, Metaverse, GameFi, and other Blockchain Specifications.

#AITA is a utility token with several use cases: Granting access to the Aitax platform and all of its features. Valuable asset for trading on exchanges. Ownership of the Aitax NFTs created by the platform. #AITA Token that every class of people can be connected to each other universally directly so that they can help each other without any hesitation and restriction. To grasp the monumental task that the developers of BNB-seek to take on, it is crucial to understand a little bit about the decentralized Internet.

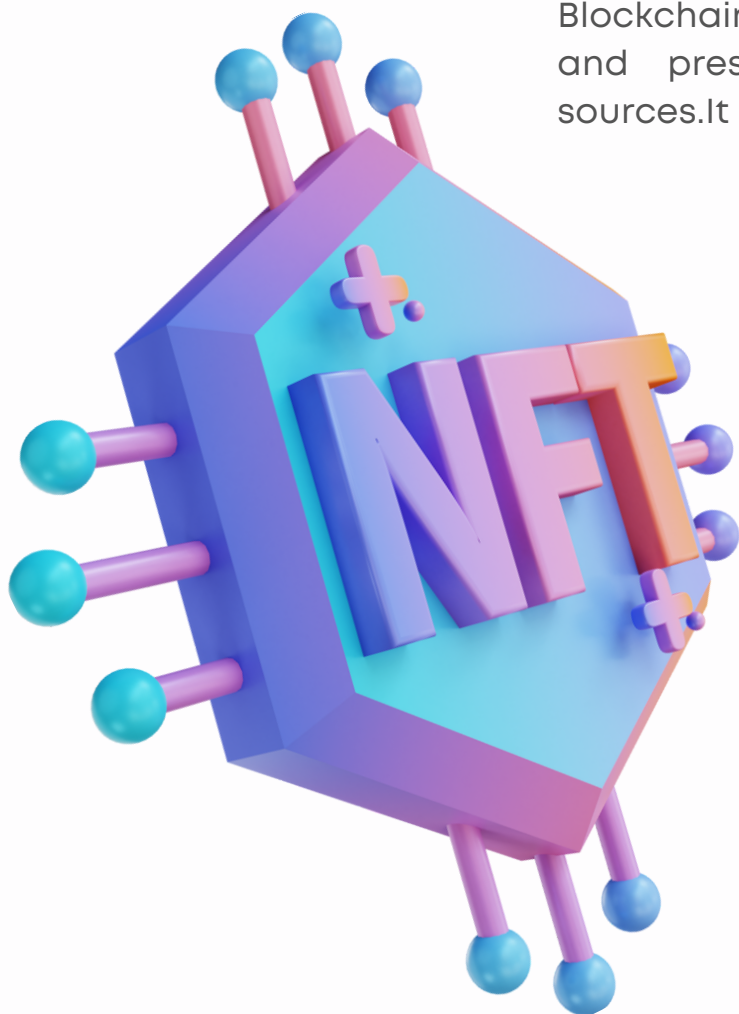

Decentralized internet differs from the internet you are used to in some essential ways. First of all, there are no hosting companies. Rather, the entire internet is run by personal users. Until recently, the concept of a decentralized network seemed impossible. The computing power of the world was not yet up too far. However, the transparent nature of blockchain networks makes them perfect for such a task. This is exactly the role that BNB is seeking. AITA is a community-funded, open sourced, Peer to Peer BEP20 token. Our NFT (Non-Fungible Token) is the most unique collections of NFTs marketplace. You can access the Aita platform through our web3 platform which supports all browsers and mobile devices.

# AITANFT

Aita is a blockchain-based network for creators to collaborate on and monetize their creative content. The network uses a NFTs (Non-Fungible Token) which allows every original piece of content to be valued as an individual item. It also offers incentives for being active on the platform. Aita is a blockchain-based NFT (Non Fungible Token) that is used to incentivize and reward the creators of quality content. It also serves as a platform for content optimization.

Aita was founded by the team behind Blockchain Experts, which is an AI-powered Blockchain company that collects, organizes, and presents information from different sources. It also offers incentives for being active on the platform, allowing members to earn #AITA tokens by adding new content, or curating other people's work.. Aitax has one of the finest unique collections of its kind of any blockchain company in the crypto industry..

# Roadmap

## Q2 2022

- Ecosystem map creation
- Blockchain Development
- Structural design

## Q3 2022

- Team formation Project
- design and analysis

## Q4 2022

- Website developments Aita smart
- contract on test Net Aita
- ecosystem development

Airdrop 0.5 Million Dollars

Dex listing

Defi ecosystem development

Community growth and engagement

Staking & Lock on Dex Platform

Game Launch

## Q1 2023

Security smart contract audit  
Major Crypto windows Listing  
CEX Exchange Listing  
Multiple stable coin integration

**Q2 2023**

Aita Nft Avatar launch  
Aita Games Edubot V.1.01  
Launch (EDUAI)  
Blockchain Scan & Wallet Test  
Ver. Launching

**Q3 2023**

Blockchain launching event World tour  
to top 25 founder community  
Ecosystem utility platform reveal

**Q4 2023**

# AITA FEATURES

---

Aita foundation created #AITA, a platform for global peer-to-peer lending and investment operations. Interest rates are set by market conditions, cutting out the middlemen. It's time to get started in this new economy..! Aidax is the most advanced decentralized digital currency with a global scalable value in this kind of any crypto currency. Aidax is the one of the unique decentralized digital currency with a Decentralized autonomous bodies. Its features are:

- Complete transparency and decentralization.
- The stability of its value.
- A safe and highly-secure network.
- Transaction speeds of up to one second.
- Worldwide availability and 24-hour trading.
- Transaction fees that are much lower than traditional credit card.

Aita blockchain is changing the way we do things. Re-writing history, block by block. Aita's blockchain gives everyone the power to make profits from anywhere in the world. The decentralized nature of our blockchain means it's free from censorship and tampering--or other malicious interference--which means that people can share ideas openly, without fear of being silenced or attacked. Uncover the world of digital currencies with Aita.

Are you ready to explore the world of digital currencies? We are too.

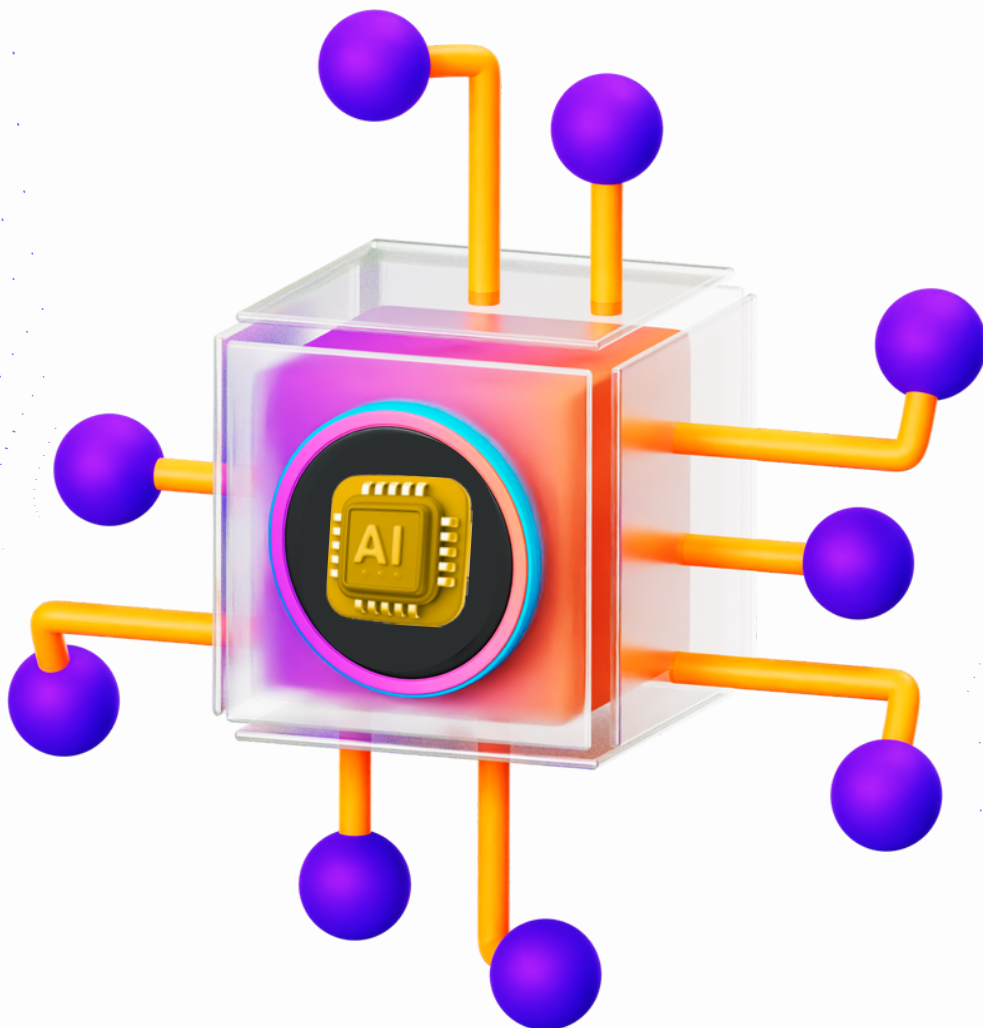

# AITA BUSINESS MODEL

# AITA BLOCKCHAIN

---

Blockchain is a kind of digital ledger in which transactions are stored. Blockchain works on the principle of distributed database management, does not have a central administrator or centralized data storage, is difficult to tamper with data, and features a peer-to-peer network protocol. Aitax Blockchain is the world's most advanced blockchain for the public welfare areas. It provides a cheaper, smarter, safer and more transparent way for people to solve social problems and provides solutions to people's practical needs. Aitax Blockchain is a new version of Blockchain is focused on the development of the public chain. Aita Blockchain provides a safe and reliable environment for storage, Data and assets, as well as trading. Aitax Blockchain is the first blockchain that has been built from the ground with a focus on privacy, security, and scalability. With Aita's new technology, users can transact in complete privacy, without worrying about their data being exposed. Transactions are instant and can scale to millions of TPS (Transactions Per Second).

# AITAVERSE

---

Aitaverse is a new way to create and share Immersive content. It is a visual studio with the power of a metaverse. Using Aitaverse, you can create and share immersive stories that are Powerful, interactive, and social. Aitaverse is the world's most advanced visual studio with virtual reality and metaverse. It integrates the world's leading 3D engine, Unity3D, with a complete set of VR ready features for creating interactive content for VR devices. The Aitaverse also includes a VR-ready metaverse, where you can import your own 3D models and create your own virtual World and virtual land.

# AITA STAKING

---

Staking is a way of earning rewards for holding certain crypto currencies. Staking can be a great way to use your crypto to generate passive income, especially because Aitax #AITA offer high interest rates for staking. Aitax #AITA token staking is a new way to help with the growth of decentralized applications. Tokens are needed to use the application and provide incentives for users, who will stake tokens in return for some reward. who will stake Aitax Tokens they will definitely get 50% of extra benefits of #AITA tokens.. for #AITA Tokens can also be used to pay NFTs, GameFi, and other service providers like developers, creators, contributors and so on.

# AITA AI GAME

---

Game usually refers to play-to-earn (P2E) blockchain gaming projects. The Aita Ai Game Protocol encourages outstanding Gamers & GameFi teams to launch GameFi projects with high playability and reasonable Tokenomics on Game list and decides whether to put them online through GDAO (Decentralized self-regulatory organization) voting. Users can buy/sell various game NFTs in AINFT, including character NFTs, props NFTs, etc. This allows users to enjoy the convenience and wealth effect brought by "game value capitalization".

# LAUNCHPAD

---

Game usually refers to play-to-earn (P2E) blockchain gaming projects. The Aita Ai Game Protocol encourages outstanding Gamers & GameFi teams to launch GameFi projects with high playability and reasonable Tokenomics on Game list and decides whether to put them online through GDAO (Decentralized self-regulatory organization) voting. Users can buy/sell various game NFTs in AINFT, including character NFTs, props NFTs, etc. This allows users to enjoy the convenience and wealth effect brought by "game value capitalization".

10

# AITA STAKING

---

Staking is the way #AITA Tokens verify its transactions, and it allows participants to earn double rewards on their holdings. Staking can be a great way to use your crypto to generate passive income, especially because Aitax offer high interest rates for staking.

Aitax #AITA Stoken staking is a new way to help with the growth of decentralized applications. This is a more energy- efficient alternative to the original proof-of-work model. Tokens are needed to use the application and provide incentives for users. Your AITA tokens are still in your possession when you stake them. You're essentially putting those staked coins to work, and you're free to unstakethem later if you want to trade them. The unstakingprocess may not be immediate;

enefits of #AITA tokens.. for #AITA Tokens can also be used to pay NFTs, GameFi, and other service providers like developers, creators, contributors and so on.

Aitax is a self-sustaining crypto ecosystem which provides various financial products, supports the development and implementation of blockchain-based projects and solves the issues of token liquidity.

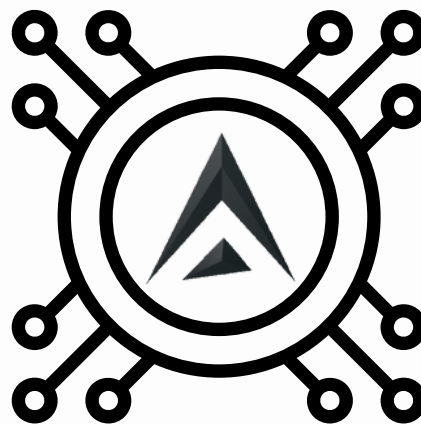

It powers up user's stake to #AITA tokens by burning AITA tokens in accordance with the amount of BNB staked. Aitax is the world's first decentralized autonomous organization (DAO) for artificial intelligence (AI) and machine learning. With Aitax, you can cash-in your data for crypto currencies

Aitax creates a tokenized economy by offering #AITA tokens to AI and ML developers, data providers, and data users. Data providers are rewarded with tokens when they provide data to help train AI algorithms. Data users are rewarded with tokens when they use the products built on top of the platform by these AI developers.

All the transactions in the new block are then validated and the new block is then added to the blockchain. The algorithm is used to verify the transaction and create a new block in the blockchain. To achieve transaction without a trusted third party, transactions must be publicly announced, and we need a system in which participants agree on a single history of the order in which they were received. The verification is reliable as long as the honest nodes control the network but becomes more vulnerable if the network is taken by hackers with more computing power.

Although network nodes can verify transactions on their own, the simplified method can be fooled by a transaction created by an attacker as long as the attacker is able to control the computing power of the network. One strategy to protect against this is to accept alerts from network nodes when they detect an invalid block, prompting the user's software to download the entire block and alerted transactions to confirm the inconsistency.

# TRANSACTIONS

---

All the transactions in the new block are then validated and the new block is then added to the blockchain. The algorithm is used to verify the transaction and create a new block in the blockchain. To achieve transaction without a trusted third party, transactions must be publicly announced, and we need a system in which participants agree on a single history of the order in which they were received. The verification is reliable as long as the honest nodes control the network but becomes more vulnerable if the network is taken by hackers with more computing power.

Although network nodes can verify transactions on their own, the simplified method can be fooled by a transaction created by an attacker as long as the attacker is able to control the computing power of the network. One strategy to protect against this is to accept alerts from network nodes when they detect an invalid block, prompting the user's software to download the entire block and alerted transactions to confirm the inconsistency..

# VISION & MISSION

---

## MISSION

The mission of the AITA blockchain is to revolutionize the gaming, education, and candidate assessment industries by leveraging the power of artificial intelligence and blockchain technology. Our goal is to create a decentralized, secure and transparent platform that provides a seamless and immersive experience for users and transforms the way people interact with technology.

## VISION

Our vision is to create a world where individuals have access to personalized and engaging experiences in gaming, education, and candidate assessment, and where their achievements and growth are recognized and rewarded on a global scale. By combining the power of AI and blockchain technology, we aim to empower users to reach their full potential and shape their future through cutting-edge and innovative solutions.

With a dedicated team of experts and a commitment to continuous innovation, the AITA blockchain is poised to become the leading platform for AI gaming, education, and candidate assessment, providing a new and inclusive ecosystem for individuals to learn, grow, and thrive in the digital age.

# CONCLUSION

---

## WHAT IS AITA ?

Aita is a project that is dedicated to the development of the blockchain in the financial, economic, and social fields. In a nutshell, it's an open-sourced, decentralized crypto-token backed by a Education Based Ai Gaming Bot, NFT, METAVVERSE, GAMEFI, WEB3 Complex. Aita's goal is to be a stable form of currency that will empower the world to get what they need. The goal is to offer people the opportunity to save up for a rainy day without having to worry about inflation or deflation.

## WHAT DOES AITA DO?

Aita will create a global blockchain base for social service system and provide a set of cutting-edge technology solutions for society, settle down, market: In the spirit of good news, we're pleased to announce that Aita currency's been secured in our reserve and all transactions are now done in Aita. We believe in AITA and it's where we stand. Welcome to the future of Aita, where Technology and crypto is king.

One last point we would like to make is the importance of finding a team with genuine passion and belief in the business, otherwise you most likely will not know if they are capable of succeeding or not. This is why we have always operated on the principle of being transparent and open to our community. And this transparency has allowed us to get feedback, collaborate and build relationships as we grow. We hope you will join us on this journey of building a company with Aita may have a very low supply, but the user demand is quite high. The Tokens are very liquid and move quickly, which is an obvious advantage for traders. The whitepaper has been well researched, which gives credibility to the idea. Aita is a decentralized crypto currency that showcases their mission to create a fairer and better world through financial stability and economic independence. Aita creates an ecosystem where these groups can develop themselves in all aspects of life through crypto currencies. It's not just about money; it's about everything...
